ATHARVA KANEKAR

• Bhandup East, Mumbai, 400042 • atharva.kanekar22@gmail.com • Mobile No:+91 9920891015
• GitHub • Portfolio • LinkedIn

Professional Summary

MCA student with a background in cybersecurity and software development. Experienced in building security-focused applications involving threat detection, honeypots, API monitoring, and incident analysis. Familiar with networking, Linux, Windows, and security tools such as Burp Suite, Nmap, and Wireshark. Interested in vulnerability assessment, penetration testing, and information security.

Education

DES Navinchandra Mehta Institute of Technology and Development — Mumbai, India
Master of Computer Applications (MCA) | CGPA: 8.32 — 2025-2027

Tilak Maharashtra Vidyapeeth — Mumbai, India
Bachelor of Computer Applications (BCA) | CGPA: 8.30 — 2022-2025

Technical Skills

Cybersecurity: Network Security Fundamentals, Threat Detection, Honeytokens, Security Monitoring, Incident Analysis
Security Tools: Burp Suite, Nmap, Wireshark
Networking: TCP/IP, DNS, Ports and Protocols, OSI Model
Operating Systems: Linux (Ubuntu), Windows
Programming Languages: Python, Java, Javascript
Databases: MongoDB, MySQL

Projects

MirageMesh - Deception-Based Cyber Threat Detection Platform - GitHub | Live Demo

• Developed a deception-based cybersecurity platform using synthetic decoys and honeytokens to identify suspicious access attempts.
• Implemented decoy management, API monitoring, and heuristic risk scoring to identify potential attack patterns across multiple decoys.
• Built an evidence timeline and incident-analysis workflow to review observed events and track simulated response actions through an audit ledger.

SUS - Scam Message and Phishing Link Detection Platform - GitHub | Live Demo

• Developed a privacy-conscious scam detection web application that analyzes suspicious SMS,WhatsApp messages, and emails using rule-based detection techniques.

• Implemented advanced scam pattern recognition, URL analysis, and brand impersonation detection to identify phishing attempts, fraudulent links, and suspicious messages.

• Built an explainable risk assessment system with risk scoring, evidence highlighting, and actionable safety recommendations to help users identify potential threats.

Certifications

Foundations of Cybersecurity | Google (Coursera)

Cisco Certified Network Associate (CCNA) | RST Forum Institute

Cybersecuirty | SWAYAM (NPTEL)

Advanced Computer Networks | SWAYAM (NPTEL)

Fundamentals of Artificial Intelligence | SWAYAM (NPTEL)
